ICONIC. ADVANCED.

Sistem hybrid eHEV memberikan pengalaman hybrid yang *electric-first*. Bukan mobil bensin yang didukung listrik, tapi mobil listrik yang didukung bensin. Anda akan merasakan sendiri bedanya. Karena tak semua hybrid diciptakan sama.

Cara kerja sistem hybrid **eHEV**

	Start	City Driving	Strong Acceleration	High-Speed Cruising	Deceleration
Mode Berkendara		EV Drive	Hybrid Drive	Engine Drive	Regenerative
Cara Kerja Mesin		ketika mobil mulai dihidupkan dan berakselerasi kecepatan rendah.	ketika membutuhkan akselerasi, mesin memberikan bantuan ke motor listrik.	ketika mencapai kecepatan tinggi yang konstan.	ketika mengurangi kecepatan, sistem mengkonversi tenaga listrik di baterai.
Powerflow					

Cara kerja sistem hybrid eHEV dapat berbeda sesuai dengan kondisi jalas, beban berkendara & cara berkendara.
